INDEX TO AUTHORS

A

ALLFREY, VINCENT G. See STACEY and ALLFREY, 807
ANVERSA, PIERO. See OLIVETTI, ANVERSA, RIGAMONTI, VITALI-MAZZA, and LOUD, 573
ASCHER, ORNA. See LUSTIG, ASCHER, FISHMAN, DJALDETTI, and PLUZNIK, 388

B

BECKER, E. L. See NACCACHE, SHOWELL, BECKER, and SHA'AFI, 635
BERNS, MICHAEL W., and RICHARDSON, STEPHANIE MEREDITH. Continuation of mitosis after selective laser microbeam destruction of the centriolar region, 977
BESHARSE, JOSEPH C., HOLLYFIELD, JOE G., and RAYBORN, MARY E. Turnover of rod photoreceptor outer segments. II. Membrane addition and loss in relationship to light, 507
–. See HOLLYFIELD, BESHARSE, and RAYBORN, 490
BIGNAMI, A. See SCHACHNER, HEDLEY-WHYTE, HSU, SCHOONMAKER, and BIGNAMI, 67
BLITZ, ALAN L., FINE, RICHARD E., and TOSELLI, PAUL A. Evidence that coated vesicles isolated from brain are calcium-sequestering organelles resembling sarcoplasmic reticulum, 135
BLOODGOOD, ROBERT A. Motility occurring in association with the surface of the *Chlamydomonas flagellum*, 983
BRANTON, DANIEL. See COHEN, KALISH, JACOBSON, and BRANTON, 119
BROKAW, C. J., and SIMONICK, T. F. Motility of triton-demembranated sea urchin sperm flagella during digestion by trypsin, 650
BYERS, H. RANDOLPH, and PORTER, KEITH R. Transformations in the structure of the cytoplasmic ground substance in erythrophores during pigment aggregation and dispersion. I. A study using whole-cell preparations in stereo high voltage electron microscopy, 541

C

CHESTER, JANICE. See LENTZ and CHESTER, 258
CHEUNG, HERBERT C. See FLOCK and CHEUNG, 339
CHUN, LINDA L. Y., and PATTERSON, PAUL H. The role of nerve growth factor in the development of rat sympathetic neurons in vitro. I. Survival, growth and differentiation of catecholamine production, 694
– and –. II. Developmental studies, 705
– and –. III. Effect on acetylcholine production, 712
COHEN, CARL M., KALISH, DOUGLAS I., JACOBSON, BRUCE S., and BRANTON, DANIEL. Membrane isolation of polylysine-coated beads. Plasma membrane from HeLa cells, 119
COLFLESH, DAVID E. See DEWEY, WALCOTT, COLFLESH, TERRY, and LEVINE, 366
CRAIG, ROGER, and MEGERMAN, JOSEPH. Assembly of smooth muscle myosin into side-polar filaments, 990

D

DAMSKY, CAROLINE H., SHEFFIELD, JOEL B., TUSZYNSKI, GEORGE P., and WARREN, LEONARD. Is there a role for actin in virus budding? 593
DAVIES, WAYNE A., and STOSSEL, THOMAS P. Peripheral hyaline blebs (podosomes) of macrophages, 941
–. See HARTWIG, DAVIES, and STOSSEL, 956
DE CHASTELLIER, CHANTAL, and RYTER, ANTOINETTE. Changes of the cell surface and of the digestive apparatus of *Dictyostelium discoideum* during the starvation period triggering aggregation, 218
–. See RYTER and DE CHASTELLIER, 200
DECKER, GLENN L. See DETERING, DECKER, SCHMELL, and LENNARZ, 899
DEGUCHI, NOBUHIRO, JØRGENSEN, PETER LETH, and MAUNSBACH, ARVID B. Ultrastructure of the sodium pump. Comparison of thin sectioning, negative staining and freeze-fracture of purified, membrane-bound (Na^+, K^+) ATPase, 619
DETERING, NANCY K., DECKER, GLENN L., SCHMELL, ELI D., and LENNARZ, WILLIAM J. Isolation and characterization of plasma membrane-associated cortical granules from sea urchin eggs, 899
DEWEY, MAYNARD M., WALCOTT, BENJAMIN, COLFLESH, DAVID E., TERRY, HOWARD, and LEVINE, RHEA J. C. Changes in thick filament length in *Limulus* striated muscle, 366
DIBONA, DONALD R. See MILLS and DIBONA, 968
DJALDETTI, MEIR. See LUSTIG, ASCHER, FISHMAN, DJALDETTI, and PLUZNIK, 388

E

EDIDIN, MICHAEL, and WEI, TAIYIN. Diffusion rates of cell surface antigens of mouse-human heterokaryons. I. Analysis of the population, 475
– and –. II. The effect of membrane potential on lateral diffusion, 483
EPPENBERGER, H. M. See WALLIMANN, KUHN, PELLONI, TURNER, and EPPENBERGER, 318
–. See WALLIMANN, TURNER, and EPPENBERGER, 297
EPSTEIN, MILES L., and GILULA, NORTON B. A study of communication specificity between cells in culture, 769

EPSTEIN, MILES L. See KALDERON, EPSTEIN, and GILULA, 788

INDEX TO SUBJECTS

A

Acetylcholine production, in vitro role of nerve growth factor, rat sympathetic neurons, biochemistry, 712
– receptors, localization of in rat brain central synapse, cytochemical EM, 258
β-*N*-Acetylgalactosamine, role in chick embryo retinotectal adhesion, biochemistry, 237
Actin filaments, sensory hairs of frog inner ear receptor cells, EM, 339
– and gelation, HeLa cells, effects of myosin and heavy meromyosin, biochemistry, 95
–, role in virus budding, mouse mammary tumor cells, autoradiography and biochemistry and EM, 593
Adhesion, correlation with cell surface proteins, Chinese hamster V79 cells, biochemistry and cytology, 464
Alga *Chlamydomonas reinhardtii*, flagella, surface motility, cinematography and EM, 983
– *Volvox carteri* f. *nagariensis*, cell shape changes, inversion mechanism, light and transmission and scanning EM, 719
Anas platychynchus, salt gland, secretory epithelium, plasma membrane localization of sodium transport sites, autoradiography and biochemistry and cytochemistry, 74
Antibody, antitubulin, demonstration of tubulin, rat trachea, epithelial cilia and basal bodies, biochemistry and immunology and EM, 586
Antigens, cell surface, diffusion rates of, mouse-human heterokaryons, cytology and immunofluorescence, 475
–, cell surface, lateral diffusion of, mouse-human heterokaryons, effect of membrane potential, cytology, 483
Aorta, calf, smooth muscle cells, comparison of *in situ* and in vitro morphology, biochemistry and cell fractionation and EM, 166
Arbacia punctulata, eggs, plasma membrane-associated cortical granules, biochemistry and EM, 899
Arginine deprivation, effect on cell cycle, KB cells, autoradiography and biochemistry and cytology, 881
– deprivation, effect on DNA synthesis, KB cells, biochemistry and cytology, 889
ATP, phagocytosis, and deformability, guinea pig macrophages, biochemistry and EM, 185
ATPase, (Na^+,K^+), membrane-bound, rabbit kidney, comparison of thin sectioning, negative staining, and freeze-fracture, 619
Autophagy of microinjected proteins, HeLa cells, autoradiography and fluorescence microscopy and histology, 807
Axoneme, flagella, golden hamster spermatozoa, twisted plane undulations, freeze-substitution light and EM, 851
L-Azetidine-2-carboxylic acid, effect on chick embryo thyroid histogenesis, light and EM, 446

B

Bands, Z, canine cardiac muscle, optical diffraction and EM, 818
Basal bodies and cilia, rat tracheal epithelium, tubulin content, biochemistry and immunology and EM, 586
Beads, polylysine-coated, membrane isolation on, HeLa cells, biochemistry and scanning EM, 119
Bone, medullary, Japanese quail, osteoclast and cell surface changes during egg-laying cycle, light and EM, 104
Brain, cow, rabbit, or rat, coated vesicles sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
–, rat, localization of acetylcholine receptors in central synapses, cytochemical EM, 258

C

Calcium and adhesion mechanisms, Chinese hamster V79 cells, biochemistry and cytology, 464
– content and distribution as function of growth and transformation, mouse 3T3 cells, biochemistry and cytology, 12
– uptake, brain coated vesicles resembling sarcoplasmic reticulum, biochemistry and immunology and EM, 135
Catecholamine production, in vitro role of nerve growth factor, rat sympathetic neurons, biochemistry, 694
Cell Biology, role of Keith Porter in development of, D3
– to cell interactions, embryonic neural retina cells, role of trypsin-sensitive cell surface components, biochemistry and immunofluorescence, 56
– cycle, effect of arginine deprivation, KB cells, autoradiography and biochemistry and cytology, 881
– cycle, *Saccharomyces cerevisiae*, effect of unequal division, time-lapse photography, 422
– cycle, *Saccharomyces cerevisiae*, regulation of mating, cytology, 355
– reaggregation and migration, microwell cultures of mouse cerebellum, time-lapse cinematography and light and scanning and transmission EM, 915
– shape changes, inversion mechanism, *Volvox*, light and transmission and scanning EM, 719

Cell surface motility, *Chlamydomonas* flagella, cinematography and EM, 983
Cells, absorptive, rat small intestine, role of microtubules in lipid transport, quantitative EM, 559
–, B, rat pancreas, membrane fusion during exocytosis, freeze-fracture EM, 23
–, calf aortic smooth muscle, comparison of *in situ* and in vitro morphology, biochemistry and cell fractionation and EM, 166
–, chick embryo myoblasts, cell-to-cell communication and myogenesis, autoradiography and electrophysiology and scanning and freeze-fracture EM, 788
–, chick embryo neural retina, adhesion to optic tecta, biochemistry, 237
–, chick embryo neural retina, role of trypsin-sensitive cell surface components in cell-cell interactions, biochemistry and immunofluorescence, 56
–, Chinese hamster V79 lung, correlation between adhesion and cell surface proteins, biochemistry and cytology, 464
–, Friend leukemia clone 745A, in vitro effect of interferon on growth and division cycle, autoradiography, 344
–, HeLa and chick fibroblasts, autophagy of microinjected proteins, autoradiography and fluorescence microscopy and histology, 807
–, HeLa, effects of myosin and heavy meromyosin on actin-related gelation, biochemistry, 95
–, HeLa S3, plasma membrane isolation on polylysine-coated beads, biochemistry and scanning EM, 119
–, KB, effect of arginine deprivation on cell cycle, autoradiography and biochemistry and cytology, 881
–, KB, effect of arginine deprivation on DNA synthesis, biochemistry and cytology, 889
–, mammalian, avian, and arthropod co-culture, communication specificity, electrophysiology and EM, 769
–, mouse BALB/c 3T3, calcium content and distribution as function of growth and transformation, biochemistry and cytology, 12
–, mouse-human heterokaryons, diffusion rates of cell surface antigens, cytology and immunofluorescence, 475
–, mouse-human heterokaryons, effect of membrane potential on lateral diffusion of cell surface antigens, cytology, 483
–, mouse mammary tumor, role of actin in virus budding, autoradiography and biochemistry and EM, 593
–, murine mastocytoma P-815-X2, correlation between movement of concanavalin A membrane receptors and cytolysis, fluorescence and scanning EM, 388
–, normal embryonic low-passage fibroblasts, plasminogen activator production, biochemistry and cytology, 31
–, normal and transformed NIL8 hamster, surface distribution of LETS protein, relation to cytoskeleton, immunofluorescence, 793
–, PTK_2, mitosis after laser microbeam destruction of centriolar region, time-lapse videotape and EM, 977
Cells, rat pituitary, surface localization of receptors for luteinizing hormone-releasing hormone, biochemistry and radioimmunoassay and EM, 528
–, rat sympathetic neurons, in vitro effect of nerve growth factor on acetylcholine production, biochemistry, 712
–, rat sympathetic neurons, in vitro effect of nerve growth factor in catecholamine production, biochemistry, 694
–, rat sympathetic neurons, in vitro role of nerve growth factor in neuronal maturation, biochemistry, 705
Centrioles, destruction by laser microbeam, mitosis in PTK_2 cells, time-lapse videotape and EM, 977
–, human neutrophils, orientation and function during chemotaxis, light and EM, 666
Cerebellum, mouse, cell reaggregation and migration, fiber and synapse formation, microwell cultures, time-lapse cinematography and light and scanning and transmission EM, 915
–, mouse, glial fibrillary acidic protein, immunoperoxidase labeling, EM, 67
Chemotactic factor gradients, orientation of polymorphonuclear leukocytes in, phase microscopy, 606
– factors, interaction with human macrophages, induction of membrane potential changes, electrophysiology, 277
Chemotaxis, human neutrophils, centriole, microtubule, and microfilament orientation and function during, light and EM, 666
Chick embryo, neural retina, adhesion to optic tecta, biochemistry, 237
– embryo, thyroid, effect of collagen inhibitors on histogenesis, light and EM, 446
–, heart muscle myofibrils, creatine kinase isoenzymes, immunofluorescence, 318
–, skeletal muscle myofibrils, creatine kinase isoenzymes, biochemistry and immunofluorescence and histochemistry and EM, 297
Chlamydomonas reinhardtii, flagella, surface motility, cinematography and EM, 983
Cilia and basal bodies, rat tracheal epithelium, tubulin content, biochemistry and immunology and EM, 586
Cochlear nucleus, guinea pig, early effects of deafferentation on postsynaptic membrane, freeze-fracture EM, 837
Collagen inhibitors, effect on chick embryo thyroid histogenesis, light and EM, 446
Communication, cell to cell, and myogenesis, chick embryo myoblasts, autoradiography and electrophysiology and scanning and freeze-fracture EM, 788
– specificity, mammalian, avian and arthropod co-culture, electrophysiology and EM, 769
Concanavalin A membrane receptors, movement of, correlation with cytolysis, murine mastocytoma cells, fluorescence and scanning EM, 388
Corpuscle, renal, rat, morphometry during normal postnatal growth and compensatory hypertrophy, light microscopy, 573
CORRECTION 997
Coturnix coturnix, egg-laying cycle, osteoclast cell surface changes, light and EM, 104

Cow, aorta, smooth muscle cells, comparison of *in situ* and in vitro morphology, biochemistry and cell fractionation and EM, 166
–, brain, coated vesicles sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
–, smooth muscle, assembly of myosin into side-polar filaments, EM, 990
Creatine kinase isoenzymes, chicken heart muscle myofibrils, immunofluorescence, 318
– kinase isoenzymes, chicken skeletal muscle myofibrils, biochemistry and immunofluorescence and histochemistry and EM, 297
Crista ampullaris, frog, actin filaments in sensory hairs of inner ear receptor cells, EM, 339
Cycloheximide, effect on division and cell cycle, *Saccharomyces cerevisiae*, time-lapse photography, 422
Cytolysis, correlation with movement of concanavalin A membrane receptors, murine mastocytoma cells, fluorescence and scanning EM, 388
Cytoplast, *Holocentrus* erythrophore, transformations during pigment aggregation and dispersion, stereo high voltage EM, 541
Cytoskeleton, surface distribution of LETS protein, normal and transformed NIL8 hamster cells, immunofluorescence, 793

D

Deafferentation, early effects of postsynaptic membrane, guinea pig cochlear nucleus, freeze-fracture EM, 837
Dedication of volume to Keith Porter, D3
Deformability and phagocytosis, guinea pig macrophages, biochemistry and EM, 185
2-Deoxyglucose, effect on macrophage deformability and phagocytosis, biochemistry and EM, 185
Detergent and dialysis, membrane reconstitution, Semliki Forest virus, biochemistry and EM, 866
Dexamethasone, effect on in vitro development, rat embryonic pancreas, biochemistry and immunology and light and EM, 398
Dialysis and detergent, membrane reconstitution, Semliki Forest virus, biochemistry and EM, 866
Dictyostelium discoideum, digestive system and membrane turnover in vegetative phase, cytochemistry and morphometric EM, 200
– *discoideum*, starvation period, changes of cell surface and digestive system, cytochemistry and morphometry and EM, 218
Diffusion, lateral, cell surface antigens of mouse-human heterokaryons, effect of membrane potential, cytology, 483
– rates, cell surface antigens, mouse-human heterokaryons, cytology and immunofluorescence, 475
Digestive system and cell surface, *Dictyostelium discoideum* starvation period, cytochemistry and morphometry and EM, 218
– system and membrane turnover, *Dictyostelium discoideum* vegetative phase, cytochemistry and morphometric EM, 200
α-α′-Dipyridyl, effect on chick embryo thyroid histogenesis, light and EM, 446
Division cycle, Friend leukemia cells, in vitro effect of interferon, autoradiography, 344
–, unequal, *Saccharomyces cerevisiae*, effect on cell cycle, time-lapse photography, 422
DNA synthesis, KB cells, effect of arginine deprivation, biochemistry and cytology, 889
Dog, cardiac muscle, optical diffraction of Z lattice, EM, 818
Duck *Anas platychynchus*, salt gland, secretory epithelium, plasma membrane localization of sodium transport sites, autoradiography and biochemistry and cytochemistry, 74

E

Eggs, sea urchin, plasma membrane-associated cortical granules, biochemistry and EM, 899
– sea urchin, vitelline layer, autoradiography and biochemistry and scanning EM, 410
Egg-laying cycle, Japanese quail, osteoclast cell surface changes, light and EM, 104
Electric organ, *Torpedo*, cholinergic nerve endings, biochemistry and EM, 43
Electron microscopy, comparison of thin sectioning, negative staining, and freeze-fracture, rabbit kidney membrane-bound (Na^+,K^+) ATPase, 619
Embryo, rat, pancreas, effect of glucocorticoids on in vitro development, biochemistry and immunology and light and EM, 398
End bulb of Held, guinea pig cochlear nucleus, early effects of deafferentation on postsynaptic membrane, freeze-fracture EM, 837
Endocytosis, and GERL, beige mouse alveolar macrophages, cytochemical EM, 381
–, *Tetrahymena pyriformis*, differentiation of food vacuolar membranes, freeze-fracture EM, 436
Enterocytes, rat small intestine, role of microtubules in lipid transport, quantitative EM, 559
Enzyme, (Na^+,K^+) ATPase, distribution on frog skin, autoradiography and light and EM, 968
–, (Na^+,K^+) ATPase, membrane-bound, rabbit kidney, comparison of thin sectioning, negative staining, and freeze-fracture, 619
– release, lysosomal, ionic movements across rabbit polymorphonuclear leukocyte membranes, biochemistry, 635
Enzymes, creatine kinase isoenzymes, chicken heart muscle myofibrils, immunofluorescence, 318
–, creatine kinase isoenzymes, chicken skeletal muscle myofibrils, biochemistry and immunofluorescence and histochemistry and EM, 297
–, phosphatases, Golgi apparatus and GERL, mammalian exocrine pancreas, cytochemistry and EM, 148
Epithelium, rat trachea, tubulin in cilia and basal bodies, biochemistry and immunology and EM, 586
–, secretory, duck salt gland, plasma membrane localization of sodium transport sites, autoradiography and biochemistry and cytochemistry, 74
Erythrophore, *Holocentrus ascensionis*, transformation in cytoplasmic ground substance during pigment aggregation and dispersion, stereo high voltage EM, 541
Exocytosis, membrane fusion during, rat pancreatic B cells, freeze-fracture EM, 23

Eye, frog, rod photoreceptor outer segments, effect of light on membrane turnover, autoradiography and light and EM, 507
–, frog, rod photoreceptor outer segments, effect of temperature on membrane turnover, autoradiography and light and EM, 490
–, rabbit, two intra-axonally transported polypeptides resembling myosin, autoradiography and biochemistry, 1

F

Factor, chemotactic, interaction with human macrophages, induction of membrane potential changes, electrophysiology, 277
–, nerve growth, role in acetylcholine production in vitro, rat sympathetic neurons, biochemistry, 712
–, nerve growth, role in development in vitro of rat sympathetic neurons, catecholamine production, biochemistry, 694
–, nerve growth, role in maturation in vitro of rat sympathetic neurons, biochemistry, 705
Fiber formation, microwell cultures of mouse cerebellum, time-lapse cinematography and light and scanning and transmission EM, 915
Filament length changes, *Limulus* striated muscle, physiology and light and EM, 366
Filaments, actin, sensory hairs of frog inner ear receptor cells, EM, 339
–, side-polar, assembly of smooth muscle myosin into, EM, 990
Fish *Torpedo*, electric organ, cholinergic nerve endings, biochemistry and EM, 43
Flagella, *Chlamydomonas reinhardtii*, surface motility, cinematography and EM, 983
–, golden hamster spermatozoa, twisted plane undulations, freeze-substitution light and EM, 851
–, triton-demembranated, sea urchin spermatozoa, motility during trypsin digestion, light microscopy, 650
Food vacuoles, membrane differentiation during endocytosis, *Tetrahymena pyriformis*, freeze-fracture EM, 436
N-Formylmethionyl peptides, orientation of polymorphonuclear leukocytes in gradients of, phase microscopy, 606
Frog *Rana pipiens*, eye, rod photoreceptor outer segments, effect of temperature on membrane turnover, autoradiographic and light and EM, 490
– *Rana temporaria* and *R. pipiens*, crista ampullaris, actin filaments in sensory hairs of inner ear receptor cells, EM, 339
–, skin, distribution of sodium pump sites, autoradiography and light and EM, 968
– *Xenopus laevis*, eye, rod photoreceptor outer segments, effect of light on membrane turnover, autoradiography and light and EM, 507

G

Gap junction phenotypes, mammalian, avian and arthropod co-culture, electrophysiology and EM, 769
– junction, role in myogenesis, chick embryo myoblasts, autoradiography and electrophysiology and scanning and freeze-fracture EM, 788
Gelation, actin-related, HeLa cells, effects of myosin and heavy meromyosin, biochemistry, 95
GERL, condensing vacuoles, mammalian exocrine pancreas, cytochemistry and EM, 148
–, ultrastructure of, beige mouse alveolar macrophages, cytochemical EM, 381
Glial fibrillary acidic protein, mouse cerebellum, immunoperoxidase labeling, EM, 67
Glucocorticoids, effect on in vitro development, rat embryonic pancreas, biochemistry and immunology and light and EM, 398
Glycoprotein incorporation into peripheral nerve myelin, biochemistry and autoradiographic light and EM, 326
Granules, cortical, plasma membrane-associated, sea urchin eggs, biochemistry and EM, 899
Growth control and unequal division, effect on cell cycle, *Saccharomyces cerevisiae*, time-lapse photography, 422
– and division cycle, Friend leukemia cells, in vitro effect of interferon, autoradiography, 344
–, normal postnatal, morphometry of rat renal corpuscle during, light microscopy, 573
– phase, normal embryonic low-passage fibroblasts, plasminogen activator production, biochemistry and cytology, 31
– and starvation periods, *Tetrahymena pyriformis*, nonidentity of ribosomal structural proteins, biochemistry, 268
– and transformation, mouse 3T3 cells, calcium content and distribution during, biochemistry and cytology, 12
Guinea pig, cochlear nucleus, early effects of deafferentation on postsynaptic membrane, freeze-fracture EM, 837
– pig, pancreas, exocrine, condensing vacuoles of GERL, cytochemistry and EM, 148
– pig, peritoneal macrophages, deformability and phagocytosis, biochemistry and EM, 185

H

Hamster *Mesocricetus auratus*, spermatozoa, flagella, twisted plane undulations, freeze-substitution light and EM, 851
–, pancreas, exocrine, condensing vacuoles of GERL, cytochemistry and EM, 148
Heart, dog, Z lattice of muscle, optical diffraction and EM, 818
Hepatocytes, rat, tubulin and microtubule compartments, biochemistry and light and EM, 731
Heterokaryons, mouse-human, diffusion rates of cell surface antigens, cytology and immunofluorescence, 475
–, mouse-human, lateral diffusion of cell surface antigens, effect of membrane potential, cytology, 483
Holocentrus ascensionis, erythrophores, transformation in cytoplasmic ground substance during pigment aggregation and dispersion, stereo high voltage EM, 541
Hormone, luteinizing hormone-releasing, surface localization of receptors for, rat pituitary cells, biochemistry and radioimmunoassay and EM, 528
Horseshoe crab, *Limulus*, striated muscle, changes in

thick filament length, physiology and light and EM, 366
Human, blood macrophages, interaction with chemotactic factors, induction of transmembrane potential changes, electrophysiology, 277
–, neutrophils, centriole, microtubule, and microfilament orientation and function during chemotaxis, light and EM, 666
–, polymorphonuclear leukocytes, orientation in gradients of chemotactic factors, phase microscopy, 606
Hypertrophy, compensatory, morphometry of rat renal corpuscle during, light microscopy, 573

I

Immunoperoxidase labeling, glial fibrillary acidic protein, mouse cerebellum, EM, 67
Interferon, effect on in vitro growth and division cycle, Friend leukemia cells, autoradiography, 344
Intestine, small, rat, role of microtubules in lipid transport by absorptive cells, quantitative EM, 559
Inversion mechanism, cell shape changes, *Volvox*, light and transmission and scanning EM, 719
Ionic coupling, mammalian, avian, and arthropod co-culture, electrophysiology and EM, 769
– coupling and myogenesis, chick embryo myoblasts, autoradiography and electrophysiology and scanning and freeze-fracture EM, 788
– movements during lysosomal enzyme release, rabbit polymorphonuclear leukocyte membranes, biochemistry, 635
Irradiation, laser microbeam destruction of centriolar region, mitosis in PTK_2 cells, time-lapse videotape and EM, 977

J

Junction, gap, phenotypes, mammalian, avian, and arthropod co-culture, electrophysiology and EM, 769
– gap, role in myogenesis, chick embryo myoblasts, autoradiography and electrophysiology and scanning and freeze-fracture EM, 788

K

Kidney, rabbit, membrane-bound (Na^+,K^+) ATPase, comparison of thin sectioning, negative staining, and freeze-fracture, 619
–, rat, renal corpuscle during normal postnatal growth and compensatory hypertrophy, morphometric light microscopy, 573

L

Laser microbeam destruction of centriolar region, mitosis in PTK_2 cells, time-lapse videotape and EM, 977
LETS protein, surface distribution, relation to cytoskeleton, normal and transformed NIL8 hamster cells, immunofluorescence, 793
Leukocytes, polymorphonuclear, human and rabbit, orientation in gradients of chemotactic factors, phase microscopy, 606
–, polymorphonuclear, rabbit, membrane ionic movements during lysosomal enzyme release, biochemistry, 635
Light, effect on membrane turnover, frog rod photoreceptor outer segments, autoradiography and light and EM, 507
Limulus, striated muscle, changes in thick filament length, physiology and light and EM, 366
Lipid transport, rat small intestine absorptive cell, role of microtubules, quantitative EM, 559
Lung, rabbit, macrophages, contractile protein translocation in spreading, phagocytosis, and phagolysosome formation, biochemistry, 956
–, rabbit, macrophages, peripheral hyaline blebs (podosomes), biochemistry and EM, 941
Luteinizing hormone-releasing hormone, surface localization of receptors for, rat pituitary cells, biochemistry and radioimmunoassay and EM, 528
Lysosome formation, phagocytosis, rabbit lung macrophages, contractile protein translocation, biochemistry, 956
Lysosomes, rabbit polymorphonuclear leukocytes, membranes, ionic movements during enzyme release, biochemistry, 635
Lytechinus pictus, spermatozoa, triton-demembranated flagella, motility during trypsin digestion, light microscopy, 650

M

Macrophage, alveolar, beige mouse, ultrastructure of GERL, cytochemistry and EM, 381
–, human blood, interaction with chemotactic factors, induction of transmembrane potential changes, electrophysiology, 277
–, peritoneal, guinea pig, deformability and phagocytosis, biochemistry and EM, 185
–, rabbit lung, contractile protein translocation in spreading, phagocytosis, and phagolysosome formation, biochemistry, 956
–, rabbit lung, peripheral hyaline blebs (podosomes), biochemistry and EM, 941
Mating, regulation of in cell cycle, *Saccharomyces cerevisiae*, cytology, 355
Maturation, rat sympathetic neurons, in vitro role of nerve growth factor, biochemistry, 705
Membrane, food vacuolar, differentiation during endocytosis, *Tetrahymena pyriformis*, freeze-fracture EM, 436
– fusion during exocytosis, rat pancreatic B cells, freeze-fracture EM, 23
– hyaline blebs (podosomes), rabbit lung macrophages, biochemistry and EM, 941
–, neuronal, early effects of deafferentation, guinea pig cochlear nucleus, freeze-fracture EM, 837
–, plasma, cortical granules, sea urchin eggs, biochemistry and EM, 899
–, plasma, duck salt gland secretory epithelium, localization of sodium transport sites, autoradiography and biochemistry and cytochemistry, 74
–, plasma, HeLa cells, isolation on polylysine-coated beads, biochemistry and scanning EM, 119
– potential changes, interaction of chemotactic factors with human macrophages, electrophysiology, 277

Membrane potential, effect on lateral diffusion of cell surface antigens, mouse-human heterokaryons, cytology, 483
–, rabbit polymorphonuclear leukocytes, ionic movements during lysosomal enzyme release, biochemistry, 635
– receptors, concanavalin A, movement of, correlation with cytolysis, murine mastocytoma cells, fluorescence and scanning EM, 388
– reconstitution by detergent-dialysis, Semliki Forest virus, biochemistry and EM, 866
– substructure, rabbit kidney, purification of (Na^+,K^+) ATPase, comparison of thin sectioning, negative staining, and freeze-fracture, 619
– turnover and digestive system, *Dictyostelium discoideum* vegetative phase, cytochemistry and morphometric EM, 200
– turnover, effect of light, frog rod photoreceptor outer segments, autoradiography and light and EM, 507
– turnover, effect of temperature, frog rod photoreceptor outer segments, autoradiography and light and EM, 490
Meromyosin, heavy, and myosin, effects on actin-related gelation, HeLa cells, biochemistry, 95
Mesocricetus auratus, spermatozoa, flagella, twisted plane undulations, freeze-substitution light and EM, 851
Microfilaments, human neutrophils, orientation and function during chemotaxis, light and EM, 666
Microtrabeculae, changes in during pigment aggregation and dispersion, *Holocentrus* erythrophores, stereo high voltage EM, 541
Microtubule compartments and tubulin, rat hepatocytes, biochemistry and light and EM, 731
Microtubules, human neutrophils, orientation and function during chemotaxis, light and EM, 666
–, role in lipid transport, rat small intestine absorptive cell, quantitative EM, 731
Microwell cultures, mouse cerebellum, cell reaggregation and migration, fiber and synapse formation, time-lapse cinematography and light and scanning and transmission EM, 915
Migration and cell reaggregation, microwell cultures of mouse cerebellum, time-lapse cinematography and light and scanning and transmission EM, 915
Mitosis after laser microbeam destruction of centriolar region, PTK_2 cells, time-lapse videotape and EM, 977
Motility, extracellular surface, *Chlamydomonas* flagella, cinematography and EM, 983
–, flagellar twisted plane undulations, golden hamster spermatozoa, freeze-substitution light and EM, 851
–, triton-demembranated sea urchin sperm flagella, effect of trypsin digestion, light microscopy, 650
Mouse, beige, alveolar macrophages, ultrastructure of GERL, cytochemical EM, 381
–, cerebellum, cell reaggregation and migration, fiber and synapse formation, microwell cultures, time-lapse cinematography and light and scanning and transmission EM, 915
–, cerebellum, glial fibrillary acidic protein, immunoperoxidase labeling, EM, 67
Mouse, peripheral nerve, glycoprotein incorporation into myelin, biochemistry and autoradiographic light and EM, 326
Muscle, cardiac, canine, optical diffraction of Z lattice, EM, 818
–, heart, chicken, creatine kinase isoenzymes in myofibrils, immunofluorescence, 318
–, skeletal, chicken, creatine kinase isoenzymes in myofibrils, biochemistry and immunofluorescence and histochemistry and EM, 297
–, smooth, calf aorta, comparison of *in situ* and in vitro morphology, biochemistry and cell fractionation and EM, 166
–, smooth, calf, assembly of myosin into side-polar filaments, EM, 990
–, striated, *Limulus*, changes in thick filament length, physiology and light and EM, 366
Myelin, peripheral nerve, glycoprotein incorporation into, biochemistry and autoradiographic light and EM, 326
Myofibrils, chicken heart muscle, creatine kinase isoenzymes, immunofluorescence, 318
–, chicken skeletal muscle, creatine kinase isoenzymes, biochemistry and immunofluorescence and histochemistry and EM, 297
Myogenesis and cell-to-cell communication, chick embryo myoblasts, autoradiography and electrophysiology and scanning and freeze-fracture EM, 778
Myosin and heavy meromyosin, effects on actin-related gelation, HeLa cells, biochemistry, 95
–, resemblance of two intra-axonally transported polypeptides, rabbit visual system, autoradiography and biochemistry, 1
–, smooth muscle, assembly of into side-polar filaments, EM, 990

N

Nerve endings, cholinergic, isolation from *Torpedo* electric organ, biochemistry and EM, 43
– growth factor, role in acetylcholine production in vitro, rat sympathetic neurons, biochemistry, 712
– growth factor, role in development in vitro of rat sympathetic neurons, catecholamine production, biochemistry, 694
– growth factor, role in maturation in vitro of rat sympathetic neurons, biochemistry, 705
–, peripheral, mouse and rat, glycoprotein incorporation into myelin, biochemistry and autoradiographic light and EM, 326
Neural retina, chick embryo, adhesion to optic tecta, biochemistry, 237
– retina, chick embryo, role of trypsin-sensitive cell surface components in cell-cell interactions, biochemistry and immunofluorescence, 56
Neutrophils, human, centriole, microtubule, and microfilament orientation and function during chemotaxis, light and EM, 666

O

β-D-Octylglucoside detergent and dialysis, membrane reconstitution, Semliki Forest virus, biochemistry and EM, 866
Optic tectal adhesion, chick embryo neural retina, biochemistry, 237

Osteoclast cell surface changes during egg-laying cycle, Japanese quail, light and EM, 104

P

Pancreas, B cells, rat, membrane fusion during exocytosis, freeze-fracture EM, 23
-, exocrine, mammalian, condensing vacuoles of GERL, cytochemistry and EM, 148
-, rat embryo, effect of glucocorticoids on in vitro development, biochemistry and immunology and light and EM, 398
Phagocytosis and deformability, guinea pig macrophages, biochemistry and EM, 185
-, *Dictyostelium discoideum*, digestive system and membrane turnover, cytochemistry and morphometric EM, 200
-, rabbit lung macrophages, contractile protein translocation, biochemistry, 956
Phosphatases, Golgi apparatus and GERL, mammalian exocrine pancreas, cytochemistry and EM, 148
Photoreceptor outer segments, frog, effect of light on membrane turnover, autoradiography and light and EM, 507
- outer segments, frog, effect of temperature on membrane turnover, autoradiography and light and EM, 490
Pigment aggregation and dispersion, *Holocentrus* erythrophores, transformations in cytoplasmic ground substance during, stereo high voltage EM, 541
Plasminogen activator production, normal embryonic low-passage cells, biochemistry and cytology, 31
Podosomes, peripheral hyaline blebs, rabbit lung macrophages, biochemistry and EM, 941
Polylysine-coated beads, membrane isolation on, HeLa cells, biochemistry and scanning EM, 119
Polypeptides resembling myosin, intra-axonally transported, rabbit visual system, autoradiography and biochemistry, 1
Polysaccharide changes in cell surface, *Dictyostelium discoideum* starvation period, cytochemistry and morphometry and EM, 218
Porter, Keith Roberts, role in development of contemporary Cell Biology, D3
Postsynaptic membrane, early effects of deafferentation, guinea pig cochlear nucleus, freeze-fracture EM, 837
Protein, actinlike, role in virus budding, mouse mammary tumor cells, autoradiography and biochemistry and EM, 593
-, contractile, translocation in rabbit lung macrophage spreading, phagocytosis, and phagolysosome formation, biochemistry, 956
-, glial fibrillary acidic, mouse cerebellum, immunoperoxidase labeling, EM, 67
-, LETS, surface distribution, relation to cytoskeleton, normal and transformed NIL8 hamster cells, immunofluorescence, 793
-, microinjected, autophagy of, HeLa cells, autoradiography and fluorescence microscopy and histology, 807
-, ribosomal structural, nonidentity of in growing and starved *Tetrahymena pyriformis*, biochemistry, 268
-, surface, correlation with adhesion, Chinese hamster V79 cells, biochemistry and cytology, 464
Protozoan *Dictyostelium discoideum*, digestive system and membrane turnover in vegetative phase, cytochemistry and morphometric EM, 200
– *Dictyostelium discoideum*, starvation period, changes of cell surface and digestive system, cytochemistry and morphometric EM, 218
– *Tetrahymena pyriformis*, endocytosis, differentiation of food vacuolar membranes, freeze-fracture EM, 436
– *Tetrahymena pyriformis*, growing and starved, nonidentity of ribosomal structural proteins, biochemistry, 268
Pump sites, (Na^+,K^+-ATPase), frog skin, autoradiography and light and EM, 968

Q

Quail, Japanese, *Coturnix coturnix*, egg-laying cycle, osteoclast cell surface changes, light and EM, 104

R

Rabbit, brain, coated vesicles sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
–, eyes, two intra-axonally transported polypeptides resembling myosin, autoradiography and biochemistry, 1
–, kidney, membrane-bound (Na^+,K^+) ATPase, comparison of thin sectioning, negative staining, and freeze-fracture, 619
–, lung macrophages, contractile protein translocation in spreading, phagocytosis, and phagolysosome formation, biochemistry, 956
–, lung macrophages, peripheral hyaline blebs (podosomes), biochemistry and EM, 941
–, pancreas, exocrine, condensing vacuoles of GERL, cytochemistry and EM, 148
–, polymorphonuclear leukocyte membranes, ionic movements during lysosomal enzyme release, biochemistry, 635
–, polymorphonuclear leukocytes, orientation in gradients of chemotactic factors, phase microscopy, 606
Radioactive label, [^{14}C]acetate, [*methyl*-^{14}C]choline, and [^{3}H]methylcholine, cholinergic nerve endings, *Torpedo* electric organ, biochemistry and EM, 43
– label, [^{14}C]ATP and [^{45}Ca]calcium chloride, brain coated vesicles sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
– label, [^{14}C]glucose, [^{3}H]Triton X-100, [^{32}P]-orthophosphate and [^{35}S]methionine, membrane reconstitution, Semliki Forest virus, biochemistry and EM, 866
– label, [^{14}C]glucose, [^{3}H]uridine, and [^{125}I]sodium iodide, peripheral hyaline blebs (podosomes), of rabbit lung macrophages, biochemistry and EM, 941
– label, [^{14}C]inulin and [^{3}H]ouabain, plasma membrane localization of sodium transport sites, duck salt gland secretory epithelium, autoradiography and biochemistry and cytochemistry, 74
– label, [^{14}C]phosphatidylcholine and [^{125}I]iodine, membrane isolation on polylysine-coated beads, HeLa cells, biochemistry and scanning EM, 119

Radioactive label, [^{14}C]- or [^{3}H]leucine, role of trypsin-sensitive cell surface components in cell-cell interactions, embryonic neural retina cells, biochemistry and immunofluorescence, 56
– label, [^{45}Ca]calcium, calcium content and distribution as function of growth and transformation, mouse 3T3 cells, biochemistry and cytology, 12
– label, [^{45}Ca]calcium, [^{42}K]potassium and [^{22}Na]sodium, ionic movements during lysosomal enzyme release, rabbit polymorphonuclear leukocyte membranes, biochemistry, 635
– label, [^{51}Cr]chromium, centriole, microtubule, and microfilament orientation and function during human neutrophil chemotaxis, light and EM, 666
– label, [^{3}H]cholesteryl oleate, calf aortic smooth muscle, comparison of in situ and in vitro morphology, biochemistry and cell fractionation and EM, 166
– label, [^{3}H]choline and [^{3}H]tyrosine, role of nerve growth factor in acetylcholine production in vitro, rat sympathetic neurons, biochemistry, 712
– label, [^{3}H]choline and [^{3}H]tyrosine, role of nerve growth factor in maturation in vitro of rat sympathetic neurons, biochemistry, 705
– label, [^{3}H]fucose, glycoprotein incorporation into peripheral nerve myelin, biochemistry and autoradiographic light and EM, 326
– label, [^{3}H]leucine, effect of light on membrane turnover, frog rod photoreceptor outer segments, autoradiography and light and EM, 507
– label, [^{3}H]leucine, effect of temperature on membrane turnover, frog rod photoreceptor outer segments, autoradiography and light and EM, 490
– label, [^{3}H]ouabain, distribution of sodium pump sites, frog skin, autoradiography and light and EM, 968
– label, [^{3}H]thymidine, effect of arginine deprivation on cell cycle, KB cells, autoradiography and biochemistry and cytology, 881
– label, [^{3}H]thymidine, effect of interferon on in vitro growth and division cycle, Friend leukemia cells, autoradiography, 344
– label, [^{3}H]α-tosyl-L-arginine methyl ester and [^{125}I]sodium iodide, plasma membrane-associated cortical granules, sea urchin eggs, biochemistry and EM, 899
– label, [^{3}H]tyrosine, role of nerve growth factor in development in vitro of rat sympathetic neurons, catecholamine production, biochemistry, 694
– label, [*methyl*-^{3}H]colchicine, tubulin and microtubule compartments, rat hepatocytes, biochemistry and light and EM, 731
– label, [*methyl*-^{3}H]thymidine, effect of arginine deprivation on DNA synthesis, KB cells, biochemistry and cytology, 650
– label, ^{125}I-bovine serum albumin, autophagy of microinjected proteins, HeLa cells, autoradiography and fluorescence and histology, 807
– label, [^{125}I]fibrinogen, plasminogen activator production, normal embryonic low-passage cells, biochemistry and cytology, 31
– label, [^{125}I]iodide, role of actin in virus budding, autoradiography and biochemistry and EM, 593
– label, [^{125}I]protein, vitelline layer of sea urchin egg, autoradiography and biochemistry and scanning EM, 410
Radioactive label, [^{125}I]sodium iodide, correlation between adhesion and cell surface proteins, Chinese hamster V79 cells, biochemistry and cytology, 464
– label, [^{35}S]methionine, two intra-axonally transported polypeptides resembling myosin, rabbit visual system, autoradiography and biochemistry, 1
Rana pipiens, eye, rod photoreceptor outer segments, effect of temperature on membrane turnover, autoradiography and light and EM, 490
– *temporaria* and *R. pipiens*, crista ampullaris, actin filaments in sensory hairs of inner ear receptor cells, EM, 339
Rat, brain, coated vesicles sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
–, brain, localization of acetylcholine receptors in central synapses, cytochemical EM, 258
–, embryo pancreas, effect of glucocorticoids on in vitro development, biochemistry and immunology and light and EM, 398
–, hepatocytes, tubulin and microtubule compartments, biochemistry and light and EM, 731
–, kidney, renal corpuscle during normal postnatal growth and compensatory hypertrophy, morphometric light microscopy, 573
–, pancreas, B cells, membrane fusion during exocytosis, freeze-fracture EM, 23
–, pancreas, exocrine, condensing vacuoles of GERL, cytochemistry and EM, 148
–, peripheral nerve, glycoprotein incorporation into myelin, biochemistry and autoradiographic light and EM, 326
–, small intestine absorptive cells, role of microtubules in lipid transport, quantitative EM, 559
–, trachea, epithelium, tubulin in cilia and basal bodies, biochemistry and immunology and EM, 586
Receptor, acetylcholine, localization of in rat brain central synapse, cytochemical EM, 258
–, luteinizing hormone-releasing hormone, surface localization of on rat pituitary cells, biochemistry and radioimmunoassay and EM, 528
–, membrane, concanavalin A, movement of, correlation with cytolysis, murine mastocytoma cells, fluorescence and scanning EM, 388
Rhodamine-conjugated proteins, microinjected, autophagy of, HeLa cells, autoradiography and fluorescence microscopy and histology, 807
Ribosomes, nonidentical structural protein, growing and starved *Tetrahymena pyriformis*, biochemistry, 268
Rod photoreceptor outer segments, frog, effect of light on membrane turnover, autoradiography and light and EM, 507
– photoreceptor outer segments, frog, effect of temperature on membrane turnover, autoradiography and light and EM, 490

S

Saccharomyces cerevisiae, cell cycle, regulation of mating, cytology, 355
– *cerevisiae*, unequal division, effect on cell cycle, time-lapse photography, 422
Salt gland, duck, secretory epithelium, plasma mem-

brane localization of sodium transport sites, autoradiography and biochemistry and cytochemistry, 74
Sarcoplasmic reticulum, resemblance to by calcium-sequestering coated vesicles isolated from brain, biochemistry and immunology and EM, 135
Sea urchin *Arbacia punctulata* and *Strongylocentrotus purpuratus*, eggs, plasma membrane-associated cortical granules, biochemistry and EM, 899
– urchin *Lytechinus pictus*, spermatozoa, triton-demembranated flagella, motility during trypsin digestion, light microscopy, 650
– urchin *Strongylocentrotus purpuratus*, eggs, vitelline layer, autoradiography and biochemistry and scanning EM, 410
Semliki Forest virus, membrane reconstitution by detergent-dialysis, biochemistry and EM, 866
Sensory hairs, frog inner ear receptor cells, actin filaments in, EM, 339
Shape changes, inversion mechanism, *Volvox*, light and transmission and scanning EM, 719
Silver, tracer of GERL, beige mouse alveolar macrophages, cytochemical EM, 381
Skin, frog, distribution of sodium pump sites, autoradiography and light and EM, 968
Sodium pump, rabbit kidney membrane-bound (Na^+, K^+) ATPase, comparison of thin sectioning, negative staining, and freeze-fracture, 619
– pump sites, frog skin, autoradiography and light and EM, 968
– transport sites, plasma membrane localization, duck salt gland secretory epithelium, autoradiography and biochemistry and cytochemistry, 74
Spermatozoa, golden hamster, flagella twisted plane undulations, freeze-substitution light and EM, 851
–, sea urchin, triton-demembranated flagella, motility during trypsin digestion, light microscopy, 650
Spreading, rabbit lung macrophages, contractile protein translocation, biochemistry, 956
Squirrel fish *Holocentrus ascensionis*, erythrophores, transformation in cytoplasmic ground substance during pigment aggregation and dispersion, stereo high voltage EM, 541
Starvation and growth periods, *Tetrahymena pyriformis*, nonidentity of ribosomal structural proteins, biochemistry, 268
– period, *Dictyostelium discoideum*, changes of cell surface and digestive system, cytochemistry and morphometry and EM, 218
Stereocilia, frog inner ear receptor cells, actin filaments in, EM, 339
Stratum spinosum, frog skin, sodium pump sites, autoradiography and light and EM, 968
Strongylocentrotus purpuratus, eggs, plasma membrane-associated cortical granules, biochemistry and EM, 899
– *purpuratus*, eggs, vitelline layer, autoradiography and biochemistry and scanning EM, 410
Surface antigens, diffusion rates of, mouse-human heterokaryons, cytology and immunofluorescence, 475
– antigens, lateral diffusion of, mouse-human heterokaryons, effect of membrane potential, cytology, 483
Surface, cell, and digestive system, *Dictyostelium discoideum*, changes in starvation period, cytochemistry and morphometry and EM, 218
– changes, osteoclast cells, Japanese quail egg-laying cycle, light and EM, 104
– components, trypsin-sensitive, role in cell-cell interactions, embryonic neural retina cells, biochemistry and immunofluorescence, 56
– distribution of LETS protein, relation to cytoskeleton, normal and transformed NIL8 hamster cells, immunofluorescence, 793
–, extracellular, motility of, *Chlamydomonas* flagella, cinematography and EM, 983
– localization, receptors for luteinizing hormone-releasing hormone, rat pituitary cells, biochemistry and radioimmunoassay and EM, 528
– proteins, correlation with adhesion, Chinese hamster V79 cells, biochemistry and cytology, 464
Synapse, central, rat brain, localization of acetylcholine receptors, cytochemical EM, 258
– formation, microwell cultures of mouse cerebellum, time-lapse cinematography and light and scanning and transmission EM, 915
Synaptosomes, isolation from *Torpedo* electric organ, biochemistry and EM, 43

T

Temperature, effect on membrane turnover, frog rod photoreceptor outer segments, autoradiography and light and EM, 490
–, regulation of mating, *Saccharomyces cerevisiae* cell cycle, cytology, 355
Tetrahymena pyriformis, endocytosis, differentiation of food vacuolar membranes, freeze-fracture EM, 436
– *pyriformis*, growing and starved, nonidentity of ribosomal structural proteins, biochemistry, 268
Thyroid, chick embryo, effect of collagen inhibitors on histogenesis, light and EM, 446
Tissue culture, calf aortic smooth muscle, comparison of *in situ* and in vitro morphology, biochemistry and cell fractionation and EM, 166
– culture, mammalian, avian, and arthropod co-culture, communication specificity, electrophysiology and EM, 769
– culture, normal embryonic low-passage fibroblasts, plasminogen activator production, biochemistry and cytology, 31
– culture, rat embryonic pancreas, effect of glucocorticoids, biochemistry and immunology and light and EM, 398
– culture, rat sympathetic neurons, role of nerve growth factor, acetylcholine production, biochemistry, 712
– culture, rat sympathetic neurons, role of nerve growth factor, catecholamine production, biochemistry, 694
– culture, rat sympathetic neurons, role of nerve growth factor in maturation of, biochemistry, 705
Torpedo electric organ, cholinergic nerve endings, biochemistry and EM, 43
Trachea, rat, epithelium, tubulin in cilia and basal bodies, biochemistry and immunology and EM, 586

Transformation and growth, mouse 3T3 cells, calcium content and distribution during, biochemistry and cytology, 12
–, normal embryonic low-passage fibroblasts, plasminogen activator production, biochemistry and cytology, 31
Triton, flagella demembranation, sea urchin spermatozoa, motility during trypsin digestion, light microscopy, 650
Trypsin digestion, effect of motility, triton-demembranated sea urchin sperm flagella, light microscopy, 650
Trypsin-sensitive cell surface components, role in cell-cell interactions, embryonic neural retina cells, biochemistry and immunofluorescence, 56
Tubulin, epithelial cilia and basal bodies, rat trachea, biochemistry and immunology and EM, 586
– and microtubule compartments, rat hepatocytes, biochemistry and light and EM, 731

V

Vacuoles, condensing, GERL, mammalian exocrine pancreas, cytochemistry and EM, 148
–, food, membrane differentiation during endocytosis, *Tetrahymena pyriformis*, freeze-fracture EM, 436
Vegetative phase, *Dictyostelium discoideum*, digestive system and membrane turnover, cytochemistry and morphometric EM, 200
Vesicles, coated, brain, sequestering calcium, resemblance to sarcoplasmic reticulum, biochemistry and immunology and EM, 135
Virus budding, mouse mammary tumor cells, role of actin, autoradiography and biochemistry and EM, 593
–, Semliki Forest, membrane reconstitution by detergent-dialysis, biochemistry and EM, 866
Vitelline layer, sea urchin egg, autoradiography and biochemistry and scanning EM, 410
Volvox carteri f. *nagariensis*, cell shape changes, inversion mechanism, light and transmission and scanning EM, 719

X

Xenopus laevis, eye, rod photoreceptor outer segments, effect of light on membrane turnover, autoradiography and light and EM, 507

Y

Yeast *Saccharomyces cerevisiae*, cell cycle, regulation of mating, cytology, 355
– *Saccharomyces cerevisiae*, unequal division, effect on cell cycle, time-lapse photography, 422

Z

Z lattice, canine cardiac muscle, optical diffraction and EM, 818

Statement of Ownership, Management and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: *The Journal of Cell Biology*. Published monthly at 1230 York Avenue, New York 10021 by The Rockefeller University Press, New York 10021. Editor: Raymond Griffiths, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 4830; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 4555. Total paid circulation, 4555; free distribution, 51; office use, left over, unaccounted for, spoiled, 224; net press run, 4830. Single issue nearest filing date October 1976.
